DETAILED ACTION

Objection to the Disclosure

35 U.S.C. 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1661

The above listing may not be complete. Applicants should carefully compare the claimed plant with the botanical descriptions set forth in the specification to ensure completeness and accuracy and to distinguish the plant within this expanding market class. Any further botanical information should be imported into the specification, as should any additional or corrected information relative to same.

Claim Rejection

35 U.S.C. § 102

Claim 1 is rejected under 35 U.S.C. 102(a) based on the invention having been known or used by others here in the U.S., or patented or described in a printed publication in or outside the U.S. more than one year prior to filing of the instant application.

Claim 1 rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention.

Art Unit: 1661

35 U.S.C. 102

The claimed Strawberry variety 'Cabot' is described in Breeder's Right grant number 0462 granted in Canada on June 6, 2002. The publication of the grant took place on August 5, 1998 and the denomination was proposed on August 5, 1997. The application filing date of March 13, 1997 was published on April 30, 1997 more than one year prior to the filing date of the instant application.

The published application, grant and denomination are each "printed publications" under 35 U.S.C. 102 because they are accessible to persons concerned with the art to which the document relates. See *In re Wyer*, 655 F.2d 221, 226, 210 USPQ 790, 794 (CCPA 1981). See also MPEP § 2128.

For example, UPOV publishes the application number, grant number, date of publication, species of plant, and variety denomination for PBR certificates, and copies of the each grant are obtainable in Canada. All documents relating to the application are open for public inspection. Thus information regarding the claimed variety, in the form of the publications noted above, was readily available to interested persons of ordinary skill in the art.

A printed publication can serve as a statutory bar under 35 U.S.C. 102(b) if the reference, combined with knowledge in the prior art, would enable one of ordinary skill in the art to reproduce the claimed plant. *In re LeGrice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure. See *Ex parte Thomson*, 24 USPQ 2d

Art Unit: 1661

1618, 1620, (Bd. Pat. App. & Inter. 1992)(“The issue is not whether the [claimed] cultivar Siokra was on public use or sale in the United States but, rather, whether Siokra seeds were available to a skilled artisan anywhere in the world such that he/she could attain them and make/reproduce the Siokra cultivar disclosed in the cited publications.”).

While the publications cited above disclose the claimed plant variety, a question remains as to whether the references are enabling. If the plant was publicly available, then the published application, combined with knowledge in the prior art, would enable one of ordinary skill in the art to reproduce the claimed plant. The ability of the Office to determine whether the claimed plant was publicly available is limited.

Search of electronic databases, the Internet and the Office’s collection of retail catalogs appears to have revealed evidence that the claimed plant was on sale and available. Furthermore, the claimed plant may have been sold at the wholesale level, sold under a different name, or even distributed to interested parties free of charge. As per the enclosed references it would seem the claimed plant was made publicly available.

Examiner is requiring this information in the attached Requirement for Information Under 37 CFR 1.105. A complete reply to this Office action must include a complete response to the attached requirement for information. The time period for reply to the attached requirement coincides with the time period for reply to this Office action.

REQUIREMENT FOR INFORMATION UNDER 37 CFR 1.105

Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined reasonably necessary to the examination of this application.

The information is required to determine when, if ever, the claimed plant variety, 'Brunswick', was publicly available prior to the filing date of the instant application.

In response to this requirement please provide any information available regarding the sale or other public distribution of the claimed plant variety anywhere in the world, including the date(s) of any sale or other public distribution. Also, please provide copies of the published applications, published proposed denomination, and published Breeder's Right grants. The Office does not maintain a collection of Breeders' Rights documents and they are not readily obtainable electronically. Since the assignee of the instant application is listed by UPOV as applicant, breeder and title holder of the granted Breeders Right (grant number 0618) it is reasonable to expect that Applicant or assignee can readily obtain the requested document and information.

The fee and certification requirements of 37 CFR 1.97 are waived for those documents submitted in reply to this requirement. This waiver extends only to those documents within the scope of this requirement under 37 CFR 1.105 that are included in applicant's first complete communication responding to this requirement. Any supplemental replies subsequent to the first

Art Unit: 1661

communication responding to this requirement under 37 CFR 1.105 are subject to the fee and certification requirements of 37 CFR 1.97.

Applicant is reminded that the reply to this requirement must be made with candor and good faith under 37 CFR 1.56. Where applicant does not have or cannot readily obtain an item of required information, a statement that the item is unknown or cannot be readily obtained will be accepted as a complete response to the requirement for that item.

This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete response to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action, which is three months.

A handwritten signature in black ink, appearing to read "Bruce Campell", is positioned above the typed name and title.
